

DARSIL PANSURIYA

BACK-END DEVELOPER

Surat, Gujarat, India - 394101 | djpansuriya6555@gmail.com | [in](#) LinkedIn

SUMMARY

Experienced Node.js Developer with over 3.5+ years of expertise in designing, developing, and maintaining scalable back-end systems and RESTful APIs. Skilled in Node.js, Express.js, and database technologies such as MS-SQL Server, MongoDB and RedisDB. Proven ability to collaborate effectively with cross-functional teams to deliver robust, high-performance solutions within tight deadlines. Dedicated to continuous learning and staying current with emerging technologies to enhance system efficiency and overall project outcomes.

TECHNICAL SKILLS

Node.js	SQL Server Management Studio
Express.js	Visual Studio Code
Sails.js	NOSQL Booster
Javascript	Jira
MS-SQL Server	GitLAB
MongoDB	Postman
RedisDB	Jenkins
LDAP	Apache Directory Studio
Web Socket	
Passport.js	

PROFESSIONAL EXPERIENCE

SRKAY Consulting Group

- SRKAY Consulting Group manages IT products and solutions for SRKAY, which is India’s largest diamond manufacturing company.
- Spearheaded the development of a high-performance backend solution using Node.js and MS-SQL Server database, significantly improving server response times and overall system efficiency.
- Managed client communications by proactively addressing concerns and resolving technical issues in real-time, resulting client satisfaction and improvement in project delivery timelines.
- Collaborated with cross-functional teams to deliver essential software features within strict deadlines, significantly enhancing customer satisfaction and retention.
- Optimized database queries, resulting in noticeable improvements in overall application performance and efficiency.

EDUCATION

Bachelor of Technology in Computer Sciene and Engineering

June 2018 - May 2022

- R. N. G. Patel Institute Of Technology - Bardoli, Gujarat - 394350
- CGPA - 8.35

PROJECTS

1. HCIS (Human Capital Information System)

Description:-

- An HRMS platform designed to streamline workforce management processes, including attendance tracking, leave management, broadcasts, surveys, and centralized control through an admin control center.

Responsibilities:

- Built RESTful APIs in Node.js/Express with JWT-based authentication and role-based access control, storing tokens and permissions in Redis for fast, scalable session management.
- Implemented real-time web notifications using WebSocket for browser users and integrated Firebase Cloud Messaging (FCM) for push notifications on mobile apps, ensuring instant updates across platforms.
- Optimized SQL Server schemas, stored procedures, and queries for employee data, attendance, and leave records ensuring high performance and data integrity.
- Built interfaces to assign, update, or revoke permissions per user or role, ensuring secure access control.

Technologies used:

- Express.js, MS-SQL Server, RedisDB, JWT, WebSocket

2. SRK Travel App

Description:-

- A multi-tenant travel management platform for organizations and their employees.

Responsibilities:

- Implemented role-based access control with user categories — Super Admin, Admin, User, Guest — using JWT tokens and Passport.js for secure authentication and authorization.
- Developed modules for employees to create and manage passports, visas, and domestic/international trips with different mode of travel.
- Automated visa-expiry reminders by implementing a Node.js Cron job scheduler to periodically scan data and trigger notifications to relevant users.
- Built a permission-driven dashboard architecture for Super Admins, Admins, and Users — improved reporting accuracy by 25% and lowered support requests.

Technologies used:

- Express.js, MS-SQL Server, Passport.js, node-cron

3. SRK PURE

Description:-

- A comprehensive platform for managing diamond inventory, grading, and sales processes, enabling efficient tracking, valuation, and streamlined transactions from stock to client delivery.

Responsibilities:

- Built dynamic pricing algorithms that calculate stones prices based on grading parameters and market indexes, improving accuracy and consistency of valuations.
- Developed real-time dashboards and reports for stock levels, grading status, and pricing trends using WebSocket, enabling instant data updates and faster.
- Integrated role-based access control for graders, supervisors, and admins to securely manage inventory and reports.
- Implemented indexing strategies and query tuning in SQL Server to reduce execution time by 25% and handle large data sets efficiently.

Technologies used:

- Sails.js, MS-SQL Server, WebSocket

4. Control Center

Description:-

- Module for Managing Permissions, Access, and Search Restrictions in a Diamond Trading Platform.

Responsibilities:

- Developed a Control Center module to manage permissions, access controls, and specific features for users of the SRK PURE and SRK .ONE platforms.
- Implemented advanced user-specific permissions, including login limits, category-based access, and daily/weekly restrictions on diamond search and appointments.

Technologies used:

- Sails.js, MongoDB, MS-SQL Server
